

The Objective: Analyze Ocean Casino Resort's performance against the Atlantic City market from 2022 to 2025 and make data-driven business recommendations to help Ocean grow.

What We're Trying to Prove or Discover

- Is Ocean Casino punching above or below its weight in the market?
- Is Ocean growing or losing ground to competitors like Borgata and Hard Rock?
- Is iGaming becoming more important than in-person revenue for Ocean?
- Where are Ocean's biggest opportunities to improve?

Phase 1: Get the data (done)

Phase 2: sort the data into CSV or Excel (done)

Phase 3: writing SQL queries to answer 6 key business questions about Ocean Casino

- What % of total AC revenue does each casino hold in person each year?

Script:

```
SELECT year, casino,  
ROUND(SUM(total_casino_win)  
/ SUM(SUM(total_casino_win)) OVER (PARTITION BY year) * 100, 2) AS  
market_share  
FROM casino_revenue_final  
GROUP BY year, casino  
ORDER BY year, market_share DESC;  
inperson\_market\_share - Google Sheets
```

- How does Ocean rank among all 9 casinos?

Script:

```
SELECT casino,  
SUM(total_casino_win) AS Overall_ranking,  
RANK() OVER (ORDER BY SUM(total_casino_win) DESC) AS Ranking  
FROM casino_revenue_final  
GROUP BY casino  
ORDER BY Ranking  
Overall ranking from all years:  
revenue\_ranking - Google Sheets
```

- Is Ocean growing faster or slower than its competitors?

Script:

```
SELECT year,casino, SUM(total_casino_win) AS total_revenue,
```

```
LAG(SUM(total_casino_win)) OVER (PARTITION BY casino ORDER BY year)
AS prev_year_revenue,
ROUND((SUM(total_casino_win) - LAG(SUM(total_casino_win))
OVER (PARTITION BY casino ORDER BY year)) / LAG(SUM(total_casino_win))
OVER (PARTITION BY casino ORDER BY year) * 100, 2) AS
growth_over_the_years
FROM casino_revenue_final
GROUP BY year, casino
ORDER BY casino, year;
Casino growth over years - Google Sheets
```

- How much of each casino's revenue comes from online vs. the floor?

Script:

```
SELECT a.casino, a.year,
a.inperson AS inperson_revenue,
b.igaming AS igaming_revenue,
c.sports AS sports_revenue,
a.inperson + b.igaming + c.sports AS total_revenue,
ROUND(a.inperson / (a.inperson + b.igaming + c.sports) * 100, 2) AS
inperson_pct,
ROUND(b.igaming / (a.inperson + b.igaming + c.sports) * 100, 2) AS
igaming_pct,
ROUND(c.sports / (a.inperson + b.igaming + c.sports) * 100, 2) AS sports_pct
FROM
(SELECT year, casino, SUM(total_casino_win) AS inperson
FROM casino_revenue_final
GROUP BY year, casino) a
JOIN
(SELECT year, casino, SUM(monthly_total_igaming_win) AS igaming
FROM igaming_final
GROUP BY year, casino) b ON a.casino = b.casino AND a.year = b.year
JOIN
(SELECT year, casino, SUM(total_sports_win) AS sports
FROM sports_wagering_final
GROUP BY year, casino) c ON a.casino = c.casino AND a.year = c.year
ORDER BY a.year, a.casino;
igaming\_vs\_inperson - Google Sheets
```

- Which months are strongest and weakest for each casino?

```

select month, casino, avg(total_casino_win) as monthly_inperson_revenue
from casino_revenue_final
group by month, casino
order by casino, monthly_inperson_revenue desc;
seasonal trends - Google Sheets

```

- How does Ocean compare to Hard Rock and Borgata?

```

WITH combined AS (
  SELECT a.year, a.casino,
    a.inperson + b.igaming + c.sports AS total_revenue
  FROM
    (SELECT year, casino, SUM(total_casino_win) AS inperson
    FROM casino_revenue_final
    WHERE casino IN ('OCEAN CASINO RESORT', 'BORGATA HOTEL CASINO
& SPA', 'HARD ROCK ATLANTIC CITY')
    GROUP BY year, casino) a
  JOIN
    (SELECT year, casino, SUM(monthly_total_igaming_win) AS igaming
    FROM igaming_final
    WHERE casino IN ('OCEAN CASINO RESORT', 'BORGATA HOTEL CASINO
& SPA', 'HARD ROCK ATLANTIC CITY')
    GROUP BY year, casino) b ON a.casino = b.casino AND a.year = b.year
  JOIN
    (SELECT year, casino, SUM(total_sports_win) AS sports
    FROM sports_wagering_final
    WHERE casino IN ('OCEAN CASINO RESORT', 'BORGATA HOTEL CASINO
& SPA', 'HARD ROCK ATLANTIC CITY')
    GROUP BY year, casino) c ON a.casino = c.casino AND a.year = c.year
)
SELECT casino, year, total_revenue,
ROUND(
  (total_revenue - LAG(total_revenue) OVER (PARTITION BY casino ORDER
BY year))
  / LAG(total_revenue) OVER (PARTITION BY casino ORDER BY year) * 100
, 2) AS growth_rate
FROM combined
ORDER BY year, casino;
competitor comparison - Google Sheets

```

Phase 4: What are the competitors doing better than Ocean? (Visuals)- *Done*
